The new coronavirus has surpassed the mark of more than 1 million infected in the world. The cure for the disease caused by the virus, or the extinction of this threat, has been the main theme of scientific studies around the world. The good news is that we have seen the evolution of research and an increasingly close solution to fight the disease.

In Italy, infected patients are receiving a new experimental plasma treatment, in which they use the blood of patients already cured of COVID-19 to treat those who are in serious condition. The result of the experience has been positive. Israel, on the other hand, announced an oral vaccine in the "final phase" of development with human trials scheduled to begin on June 1. A good prospect to end the week!

MARKET

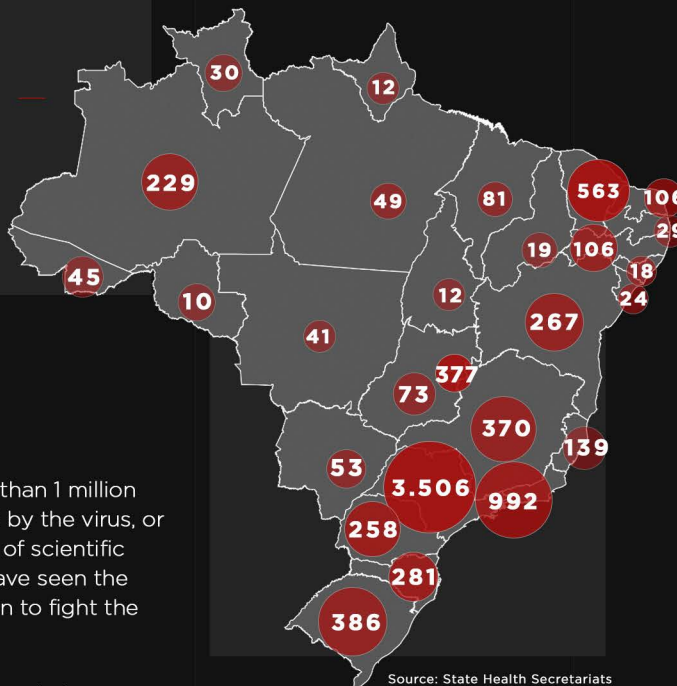

The "ups and downs" of the financial market continues to be frantic. Asian stock markets closed down or with irrelevant indexes on Thursday (03). In Japan, the stock market remained stable and recorded a 0.01% rise. In Shanghai the drop was 0.60% and in Hong Kong there was a decline of 0.19%. The Ibovespa closed up 1.81% on Thursday, but the dollar exceeded R\$ 5.20.

TOURISM

The Minister of Tourism Marcelo Alvaro Antonio announced yesterday (02) that there is ready an interim measure which allows the reimbursement or provision of services of tourism companies and events up to 12 months after the end of the pandemic. With the measure, companies are free to make immediate reimbursement, which should bring a breather to the sector.

STREAMING

Facebook, Microsoft, Youtube and the Netflix streaming platform are companies that are expected to come out even bigger and strengthened at the end of the pandemic. That's because social isolation has accelerated the use of technology. Enjoy the weekend at home and catch up on the series and book reading.
